DETAILED ACTION

1. Claims 1-20 have been examined and are pending with this action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Cargile (US 4,599,489 A).

INDEPENDENT:

As per **claim 1**, Cargile teaches a method of limiting an application program's usage by a user (see col.12, lines 21-22 & 44-46) comprising the steps of:

executing the application program (see col.11, line 65);

concurrently starting a timer (inherent: see col.1, lines 61-65 and col.12, lines 46-49); and

stopping execution of application program if the timer registers a time equal or greater than a pre-determined time (see col.12, lines 49-57).

Art Unit: 2155

As per **claim 6**, Cargile teaches a computer program product on a computer readable medium for limiting an application program's usage by user (see col.12, lines 21-22 & 44-46) comprising:

code means for executing the application program (see col.11, line 65);

code means for concurrently starting a timer (inherent: see col.1, lines 61-65 and col.12, lines 46-49); and

code means for stopping execution of the program if the timer registers a time equal or greater than a pre-determined time (see col.12, lines 49-57).

As per **claim 11**, Cargile teaches an apparatus for limiting an application program's usage by a user (see col.12, lines 21-22 & 44-46) comprising:

means for executing application program (see col.11, line 65);

means for concurrently starting a timer (inherent: see col.1, lines 61-65 and col.12, lines 46-49); and

means for stopping execution of the application program if the timer registers a time equal or greater than a pre-determined time (see col.12, lines 49-57).

As per **claim 16**, Cargile teaches a computer system for limiting an application program's usage by a user (see col.12, lines 21-22 & 44-46) comprising:

at least one memory device for storing code data (see col.1, lines 15-20);
and

at least one processor for processing the code data to execute the application program (see col.11, line 65), to concurrently start a timer (inherent:

Art Unit: 2155

see col.1, lines 61-65 and col.12, lines 46-49), and to stop execution of the application program if the timer registers a time equal or greater than a pre-determined time (see col.12, lines 49-57).

DEPENDENT:

As per **claims 2, 7, 12, and 17**, which respectively depend on claims 1, 6, 11, and 16, Cargile teaches of further comprising the step of ascertaining whether the user is permitted to use application program before executing the application program (see col.2, lines 4-8 and col.11, lines 62-65).

As per **claims 3, 8, 13, and 18**, which respectively depend on claims 2, 7, 12, and 17, Cargile further teaches wherein the step of ascertaining whether the user is allowed to use the application program further comprises the step of ensuring that there is not a time interval restriction (see col.12, lines 54-57).

As per **claims 4, 9, 14, and 19**, which respectively depend on claims 3, 8, 13, and 18, Cargile teaches of further comprising the step of making sure the time interval has elapsed before the user is allowed use the application program if there is a time interval restriction (see col.12, lines 54-57).

As per **claims 5, 10, 15, and 20**, which respectively depend on claims 4, 9, 14, and 19, although Cargile does not further teach explicitly wherein the pre-determined time, is determined by an administrator, such limitations are (inherent: see col.12, lines 21-22: "owner of software").
